VIDEO GAME CREATION

Lesson 15 - Ready to Show

Semester 1, Week 15 - Level 3 Refined Milestone / Capstone Presentation

- **Objectives:** Self-assess a finished capstone game against the full Level 1/2/3 checklist accumulated since Lesson 2; prioritize and complete a final polish pass; present a working game confidently to the class.
- **IGDA Tie-In:** Production - scoping, finishing, presenting a project (intermediate); all Five Disciplines, in review
- **Format:** No lecture demo this week - a workshop-and-showcase day. No new mechanics are taught.
- **Materials:** Demo laptop with a finished example project per engine (backup only); Student Handouts (checklists), one per engine; students' own Lesson 14 projects - this IS the capstone, nothing new to bring

Agenda

0:00-0:10	Welcome back, capstone reflection, milestone framing
0:10-0:55	POLISH TIME: work the full capstone checklist
0:55-1:00	Presentation logistics, running order/sign-up
1:00-1:50	PRESENTATIONS: ~2 minutes per student
1:50-2:00	Closing celebration, look ahead to Semester 2 (incl. testing becoming ongoing)

This lesson's "Levels" are a milestone checkpoint, not a new exercise

- Level 1 (Minimal) reached: core mechanics (Lessons 2-11) all work - move, shoot, score, lives, win/lose, restart, multiple waves.
- Level 2 (Complete) reached: sound (Lesson 12) and hit reactions (Lesson 13) are both fully wired in.
- Level 3 (Refined) reached: difficulty scaling (Lesson 14) is present, and at least a good-faith attempt at one chosen stretch feature exists - this is today's actual milestone, matching the capstone GDD's Feature-to-Lesson Map.

See: Lesson 15 Teacher's Script, Lesson 15 Prep Checklist, and the per-engine Student Handouts (checklists + presentation guide). This is a milestone lesson - plan real time for celebration, same as Lessons 6 and 11.
