Student Resource List

Supplemental tutorials, references, and free asset sites

VIDEO GAME CREATION

Use these alongside weekly lessons. Engine-specific sections cover official docs and beginner tutorial paths; the general sections at the end (art, audio, design) apply no matter which engine you're using.

Scratch

- **Scratch itself:** https://scratch.mit.edu - browser-based editor and project gallery
- **Scratch Tutorials:** https://scratch.mit.edu/ideas - official starter tutorials built into the editor
- **Coding Cards (PDF):** https://scratch.mit.edu/starter-projects - printable step-by-step project guides

Godot

- **Official Docs:** https://docs.godotengine.org - the primary reference for GDScript and the editor
- **Godot's own First 2D Game tutorial:** https://docs.godotengine.org/en/stable/getting_started/first_2d_game/index.html - the standard official beginner project
- **GDQuest (YouTube & free courses):** https://www.gdquest.com - widely-used free/paid Godot tutorials

Unity

- **Unity Learn:** https://learn.unity.com - official free tutorials and courses
- **Unity Essentials Pathway:** https://learn.unity.com/pathway/unity-essentials - guided intro path - start here
- **Junior Programmer Pathway:** https://learn.unity.com/pathway/junior-programmer - C# scripting-focused path toward certification

- **Creative Core Pathway:** https://learn.unity.com/pathway/creative-core - design/art-leaning path for less code-focused students
- **Unity Certifications:** https://unity.com/products/unity-certifications - official certification exams (paid, Pearson VUE)

GameMaker

- **GameMaker Official Tutorials:** https://gamemaker.io/en/tutorials - official beginner-to-advanced tutorial library
- **GameMaker Manual:** https://manual.gamemaker.io - full GML and GML Visual reference

GDevelop

- **GDevelop Wiki/Docs:** https://wiki.gdevelop.io - official documentation and tutorials
- **GDevelop official tutorials page:** https://gdevelop.io/tutorials - step-by-step starter games

TIC-80

- **TIC-80 official site & docs:** https://tic80.com - getting started guide and wiki
- **TIC-80 Wiki (GitHub):** https://github.com/nesbox/tic-80/wiki - language references for Lua, JS, Python, and more

001 Game Creator

- **Documentation Wiki:** https://001gamecreator.com/wiki/ - official reference for the graphical scripting system and editor
- **STEM Learning Courses:** https://001gamecreator.com/educational-courses/ - structured classroom-oriented lessons
- **Guides and Tutorials:** https://001gamecreator.com/video-guides/ - official written and video tutorials
- **Educational Version Info:** https://001gamecreator.com/educational/ - classroom licensing tiers and the optional E-Book/quiz bundle

Unreal Engine (optional track)

- **Unreal Online Learning:** https://dev.epicgames.com/community/learning - official free courses, including Blueprints for beginners
- **Unreal Blueprints Quick Start:** https://dev.epicgames.com/documentation/en-us/unreal-engine/blueprints-visual-scripting-in-unreal-engine - official visual scripting introduction

Free Art, Audio & Design Assets (any engine)

- **Kenney.nl:** https://kenney.nl - large library of free, license-friendly 2D/3D game art
- **OpenGameArt.org:** https://opengameart.org - community-contributed free game art and audio
- **Freesound.org:** https://freesound.org - free sound effects (check each clip's license)
- **Piskel:** https://www.piskelapp.com - free browser-based pixel art / sprite editor
- **Audacity:** https://www.audacityteam.org - free, open-source audio editor for sound effects and music
- **itch.io:** https://itch.io - browsing inspiration, and eventually a place to publish/share your finished game

General Game Design & Programming Concepts

- IGDA Game Education SIG (framework this course is aligned to): igda.org/sigs/game-education
- Ask your instructor about age-appropriate books/videos on game design fundamentals if you want to go deeper between engines
