Lesson 6: Victory Condition

001 Game Creator (Windows only)

VIDEO GAME CREATION

This week: a real win condition. Your job is to track how many enemies are left and show "You Win!" the moment the last one is destroyed - completing your game's Level 1 MVP milestone.

Open your own [YourName]Game project from Lesson 5 - don't start a new one. Everything this week builds on the row of enemies you already have.

Tip: no new assets this week - "You Win!" is shown with each engine's own basic text tools, not an image.

Setup

1. Open your [YourName]Game project from Lesson 5.
2. Create a new Variable (Resources > Variables/Switches/Collections/Tables) named enemies_remaining, default value 5.

Level 1 - Minimal (MVP)

The moment the last enemy is destroyed, "You Win!" appears on screen. This completes your game's Level 1 MVP milestone - a complete, playable core loop.

3. On the enemy Actor Template, add a second Actor Trigger: "Defeated / Destroyed" - this fires automatically whenever a copy of this Actor is destroyed, for any reason, separately from the "Collided with actor" trigger you built in Lesson 4.
4. In that trigger's script, add a Variable event that decreases enemies_remaining by 1.
5. Add an "If" event checking whether enemies_remaining is 0 or less - inside it, add a "Message Box" event with the text "You Win!".
6. Save, then Play/Test and destroy every enemy to test - "You Win!" should appear the instant the last one is destroyed.

```
enemy Actor Trigger: Defeated / Destroyed ->
  Variable – Modify Value(enemies_remaining, Subtract, 1)
  If(enemies_remaining <= 0)
    Message Box("You Win!")
```

Level 2 - Complete (Alpha/Beta)

The win text appears exactly once, exactly when the last enemy is destroyed - not early, not late, and not repeatedly.

- Destroy all 5 enemies and confirm "You Win!" appears exactly once, exactly when the last one is destroyed - not one enemy early, and not repeatedly.
- This already works correctly because "Defeated / Destroyed" fires exactly once per Actor copy, no matter what destroyed it, and the If check only ever passes once enemies_remaining actually reaches zero.

Level 3 - Refined (Ready to Publish) - pick any that interest you

- Sound: import the provided sfx_win.wav, then add a "Play Sound" event to the "Defeated / Destroyed" trigger's script, right before the Message Box.
- Visual: look at the Message Box's own settings (or Visual Settings for message boxes generally) for a background/border color that stands out as a "win" moment rather than a plain dialogue box.
- Structure: keep this counting logic entirely on its own "Defeated / Destroyed" trigger, separate from "Collided with actor" - one trigger handles the fight itself, the other tracks overall progress. (Unlike Scratch/Godot/GameMaker/Unreal, 001 Game Creator's Actor Triggers are bound to the actor they're attached to, so this logic stays on the enemy Template itself rather than moving to a separate "GameManager" Actor - see the Book Notes entry on this decision.)

If Something's Wrong

- "You Win!" never appears: confirm the "Defeated / Destroyed" trigger is actually attached to the enemy Actor Template (not main or the bullet), and that the Variable event is targeting the correct Variable name.
- "You Win!" appears too early: confirm enemies_remaining's default value actually matches how many enemy copies you placed in Lesson 5.
- Message Box doesn't appear even though the trigger seems to fire: confirm the If event's condition is actually enemies_remaining <= 0 and that the Message Box event is nested inside it, not after it unconditionally.
