Lesson 6 Teacher's Key

001 Game Creator

INSTRUCTOR ONLY - do not distribute to students

Level 1 - Complete Worked Solution

A new Variable and a second Actor Trigger on the enemy Template - completely separate from Lesson 4's "Collided with actor" trigger:

```
New Variable: enemies_remaining, default value 5

enemy Actor Trigger: Defeated / Destroyed ->
  Variable – Modify Value(enemies_remaining, Subtract, 1)
  If(enemies_remaining <= 0)
    Message Box("You Win!")
```

Level 2 - Complete Worked Solution

"Defeated / Destroyed" fires exactly once per Actor copy, no matter what destroyed it, and the If check only ever passes once enemies_remaining actually reaches zero - there's no path where the message could appear early, late, or more than once.

Level 3 - All Worked Solutions

Every stretch-goal idea from the handout, fully worked - not just one. Useful for validating each idea actually works before class, and as a ready reference no matter which one a student ends up picking.

Sound: victory sound

Add a Play Sound event before the Message Box, using the provided sfx_win.wav:

```
enemy Actor Trigger: Defeated / Destroyed ->
  Variable – Modify Value(enemies_remaining, Subtract, 1)
  If(enemies_remaining <= 0)
    Play Sound(sfx_win.wav)
    Message Box("You Win!")
```

Visual: distinct message box style

Check Visual Settings for message boxes for a background/border color option that reads as a celebration rather than ordinary dialogue - applied globally, or via any per-box style override your installed version supports.

Structure: two triggers, two jobs

"Collided with actor" handles the fight itself (destroying the bullet and the enemy) - "Defeated / Destroyed" only ever tracks overall progress. Neither trigger needs to know about the other.

Complete Level 3 solution (all 2 goals combined)

The Defeated/Destroyed trigger with sound added:

```
enemy Actor Trigger: Defeated / Destroyed ->
  Variable – Modify Value(enemies_remaining, Subtract, 1)
  If(enemies_remaining <= 0)
    Play Sound(sfx_win.wav)
    Message Box("You Win!")
```
