Lesson 15 Teacher's Key: Ready to Show

Unreal Engine (optional advanced track) - Instructor Reference Only

VIDEO GAME CREATION

How This Key Is Different Today

There's no new Level 1 solution to give this week - Lesson 15 is a polish-and-present day, not a new-mechanic day. This Key instead consolidates the most common last-mile issues seen across this engine's Lessons 2-14, to help you diagnose a stuck student quickly during polish time.

Known Recurring Quirks in This Engine

- A Custom Event dispatcher (like OnEnemyDestroyed) bound more than once across multiple Play sessions without a full editor restart, causing double-fired logic.
- An unset Blueprint variable quietly defaulting to 0/null instead of erroring, especially for anything added recently (EnemySpeed, explosion references, Dynamic Material Instances).
- A Delay node left over from testing (or an unusually long one) making the game feel sluggish or unresponsive during a live demo.

Fast Diagnostic Questions

- "Check the Output Log for a warning or error" - Unreal surfaces most null-reference and binding issues here.
- "Has this dispatcher/event been bound more than once?" - relevant anywhere double-fired logic is suspected.

If a Student Is Significantly Behind

Prioritize getting Lessons 6-11's Level 1 (win/lose, restart, multiple waves) solidly working before anything from Lessons 12-14 - a complete, simple game presents better than a broken ambitious one. Given this track's optional/advanced status, it's also fine for a struggling student to present a strong Level 1/2 build without every Level 3 feature.

Presentation Day Notes

- Have students Play in a fresh Editor session (not a long-running one with many prior Play/Stop cycles) before presenting, since accumulated state occasionally causes odd one-off behavior.
